👤 About Me

I am a Junior QA Engineer with less than 1 year of experience. I have strong experience in test documentation creation Test Plans, Test Cases and Checklists. Worked with Web and Mobile projects. Responsible for Test design and execution, using Testomat test management system and Jira.

English: Pre-Intermediate

✛ Skills

- Test Design
- Test Planning
- API Testing with Postman
- Mobile Testing
- SQL
- Test Management
- Test Execution

💼 Experience

Trainee QA Engineer
RY Consulting   Mar 2025 - Present

I am responsible for different stages of testing. Starting from the Requirements Analysis, using the Matrix of Requirement Analysis according to various criteria. Preparing Test plans for the project release cycle. Also preparing different test documentations, such as Test Cases, Checklists, and Charters. Using different Test Design Techniques: Boundary Value Analysis, Equivalent Partitioning, Pairwise, Decision Table, State & Transition Diagrams, and Tables. Reporting Bugs in Jira projects, with corresponding Severity and Priority. Also attaching different logs, screenshots, and video files as needed. Managing Jira Dashboards with different Filters: "Bugs created by me", "My current Tasks", "Test Coverage metrics", and so on. Preparing Test Report results after each release cycle with all needed statistics: Test cases (passed, failed, blocked, skipped), the number of Bugs with Priority level, and Known issues.
